

Repkord

6: Optional Wall Mount

Written By: Pooch

Step 1 — Wall Mount Kit Install

- Find a safe place on your wall to hang your RepBox SECURELY.

⚠ WARNING: A loaded RepBox can be upwards of 10kg. Please make sure your cleat is anchored SAFELY to the wall. If you are uncomfortable with this please consult a professional.

- You may use the supplied wall anchors to mount the cleat into drywall or plaster but we strongly recommend finding at least one wooden stud to fasten to.
- ⓘ The holes on either end of the cleat are exactly 16" apart so that you can span two studs in standard 16" OC wood framed houses.
- You may also fasten to masonry or metal studs if using proper anchor bolts / machine screws (not included)
